WEEK 1 TRIAGE

Days 1 to 7: Immediate Damage Control & Lockdown

When an in-house biller hands in their notice, 80% of practice knowledge is at risk. Immediate operational triage is required before their last working day.

01**Audit Clearinghouse 277CA Queues**

Extract every rejected claim that never reached payer adjudication. These claims are quietly aging out of timely filing limits.

02**Inventory Payer Portal Logins & EDI Enrollment**

Ensure practice leadership has master administrator credentials for Availity, Optum, Medicare Noridian/Novitas, and Medicaid.

03**Pull a Clean A/R Aging Benchmark**

Run a complete aging report segmented by 30/60/90/120+ days to establish baseline accounts receivable before handoff.

CRITICAL DECISION

Hire Another In-House Biller vs Partnering with an RCM Team?

Hiring Replacement
